About Us

In alignment with the ingenious Saudi Vision 2030 and under the umbrella of our esteemed parent company, **Muscat Gases SAOG (Oman)**, we proudly present **Muscat Power Solutions (MPS)** – a dynamic subsidiary committed to reshaping the energy landscape in the Kingdom of Saudi Arabia.

MPS has set its roots in the heart of the Kingdom with the head office based in Olaya – Riyadh with services and products reaching out to the entire geographical scope of the Kingdom.

Established with the expertise inherited from Muscat Gases and its four decades of excellence in sustainable energy solutions, MPS carries forward a tradition of reliability, customer-centricity, and a commitment to innovation.

Vision

To be the leading force in shaping a sustainable and innovative energy landscape in **Saudi Arabia**, driving progress and prosperity in alignment with the Kingdom's vision for a dynamic future.

Mission

We aim for excellence, aiming to be the top choice for customers by providing a wide range of products and services, prioritizing technology, and safety, and supporting their business success.

Our Values

Innovation

We foster a **culture of creativity** and continuous improvement, leveraging advanced technologies to pioneer innovative solutions.

Customer Centricity

We prioritize our customers, customizing solutions to their needs for **lasting partnerships**.

Integrity

We conduct business with **honesty, transparency, and ethical behavior**, fostering trust and reliability in all interactions.

Safety

Safety is non-negotiable. Safety standards and protocols are followed to protect employees, customers, and communities.

Quality Excellence

We **prioritize quality and excellence** in all aspects of our work, ensuring client satisfaction and success.

Environmental Stewardship

We aim to reduce our ecological impact by promoting **sustainable & environmental friendly practices**.

Our Expertise

We work across a wide range of sectors, providing tailored energy solutions that meet the unique demands of each environment:

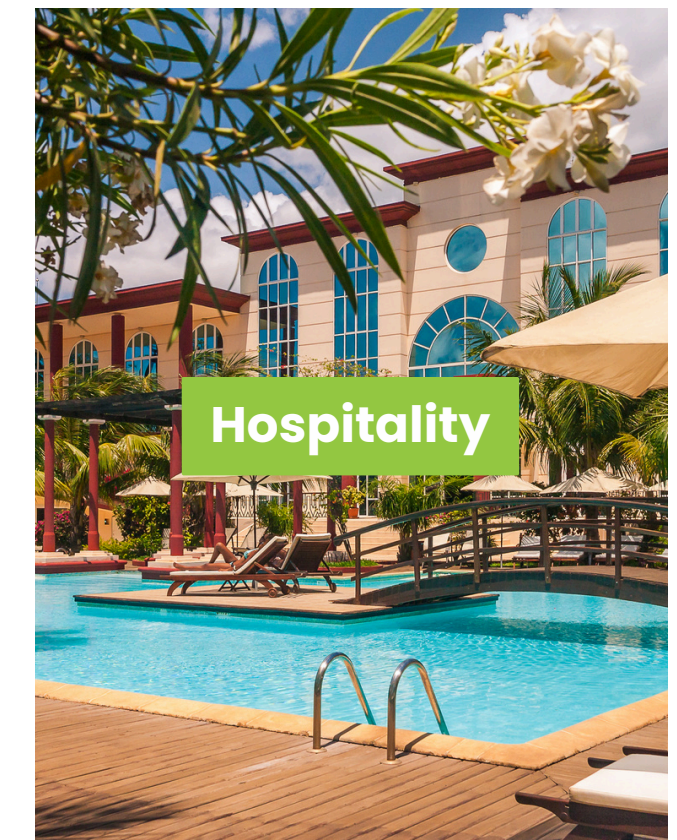

Seamlessly integrated systems that support all needs of the mixed use development or townships, providing a dependable safe and secure energy utility backbone.

Reliable and safe energy supply for complex manufacturing processes, ensuring operational efficiency.

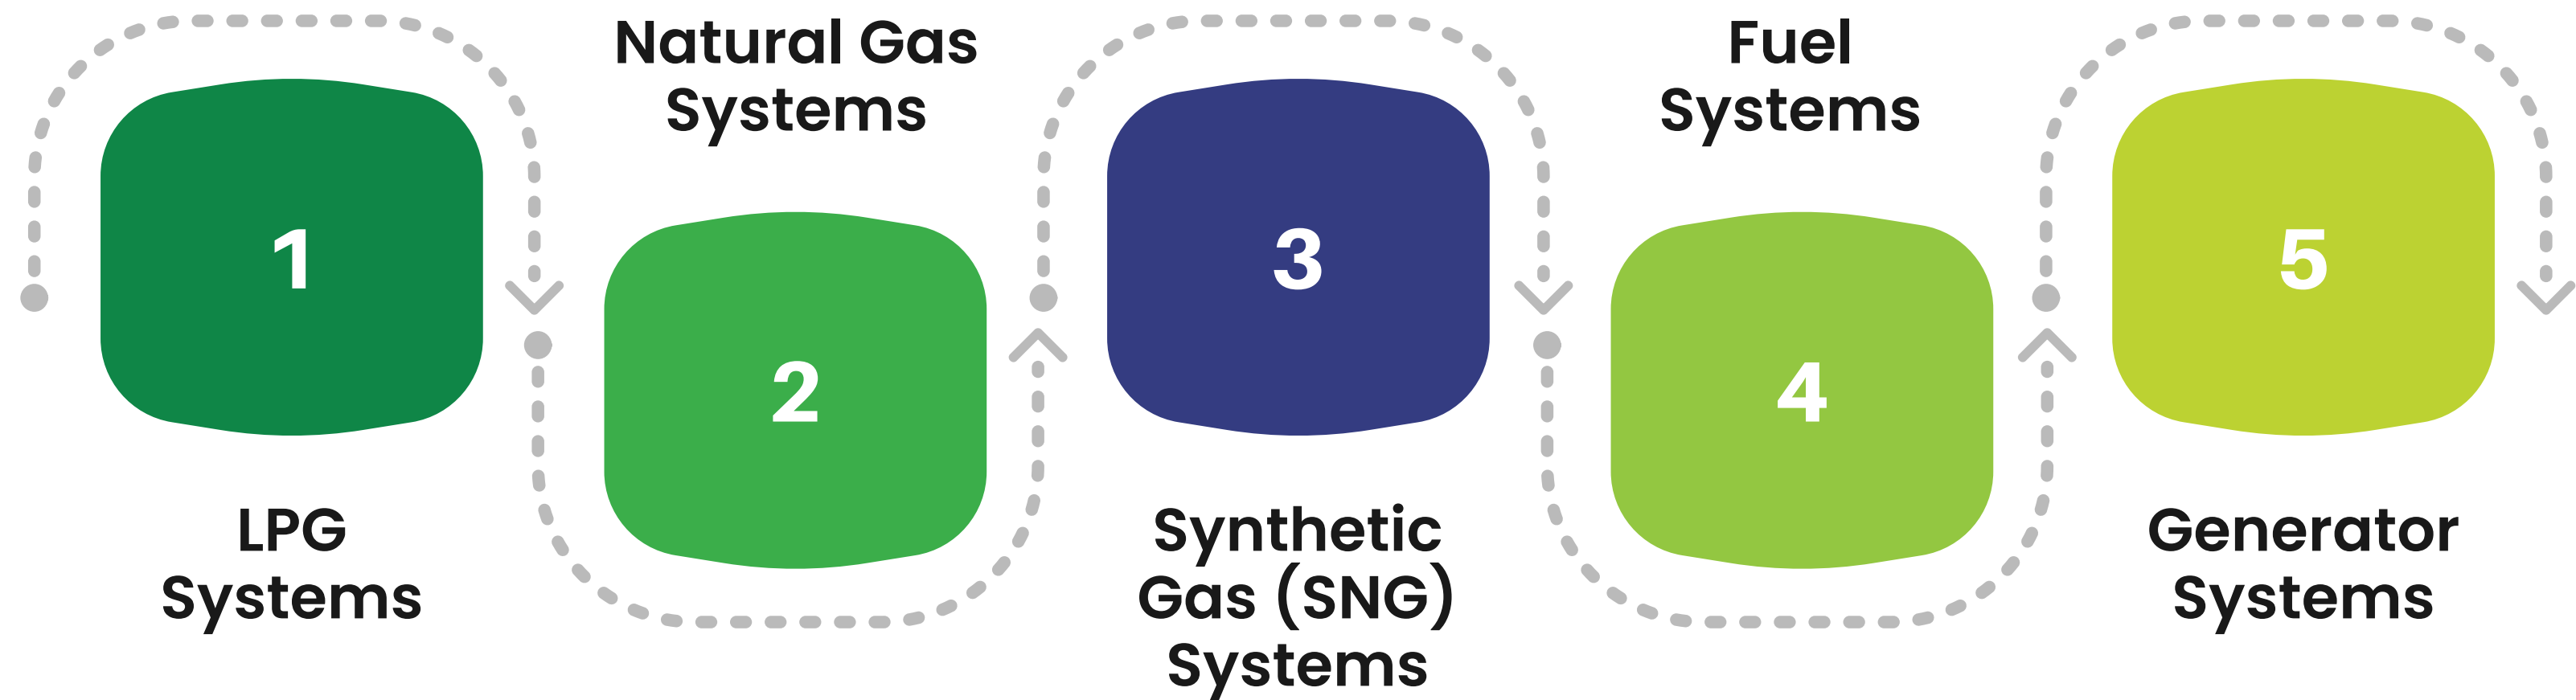

Customized solutions focus on enhancing residents' quality of life by emphasizing safety, convenience, and sustainability.

Highly reliable systems that support uninterrupted power and energy supply in healthcare facilities, where precision and dependability are critical.

Energy solutions that ensure comfort and operational efficiency in hotels and resorts, maintaining a superior guest experience.

Our Products

LPG Systems

Our LPG Systems are created to provide secure central gas solutions, for storing, distributing and converting Liquefied Petroleum Gas (LPG).

LPG Bulk Storage Tanks

Engineered with safety and efficiency in mind, our tanks can store quantities of LPG guaranteeing a supply for industrial and commercial needs for all sizes.

LPG Pumps and Compressors

Pumps and compressors play a crucial role, in transferring and pressurizing LPG enabling smooth operation across all systems

LPG Vaporizer Systems

These systems transform liquid LPG into gas form to ensure a continuous and efficient energy supply, essential for various uses.

Additional Product Lines

We provide a wide range of components and accessories to support the effective functioning of LPG systems promoting seamless integration and optimal performance.

Natural Gas Systems

Our Natural Gas Systems prioritize the accurate and effective management and dispersal of gas.

Downstream Pressure Regulation Units

These units guarantee the secure and reliable transmission of natural gas by regulating and upholding desired pressure levels for utility applications.

Metering Units and Associated Functions

Vital, for measurement and regulation of natural gas movement our metering units guarantee effectiveness.

Natural Gas Pipeline Infrastructures

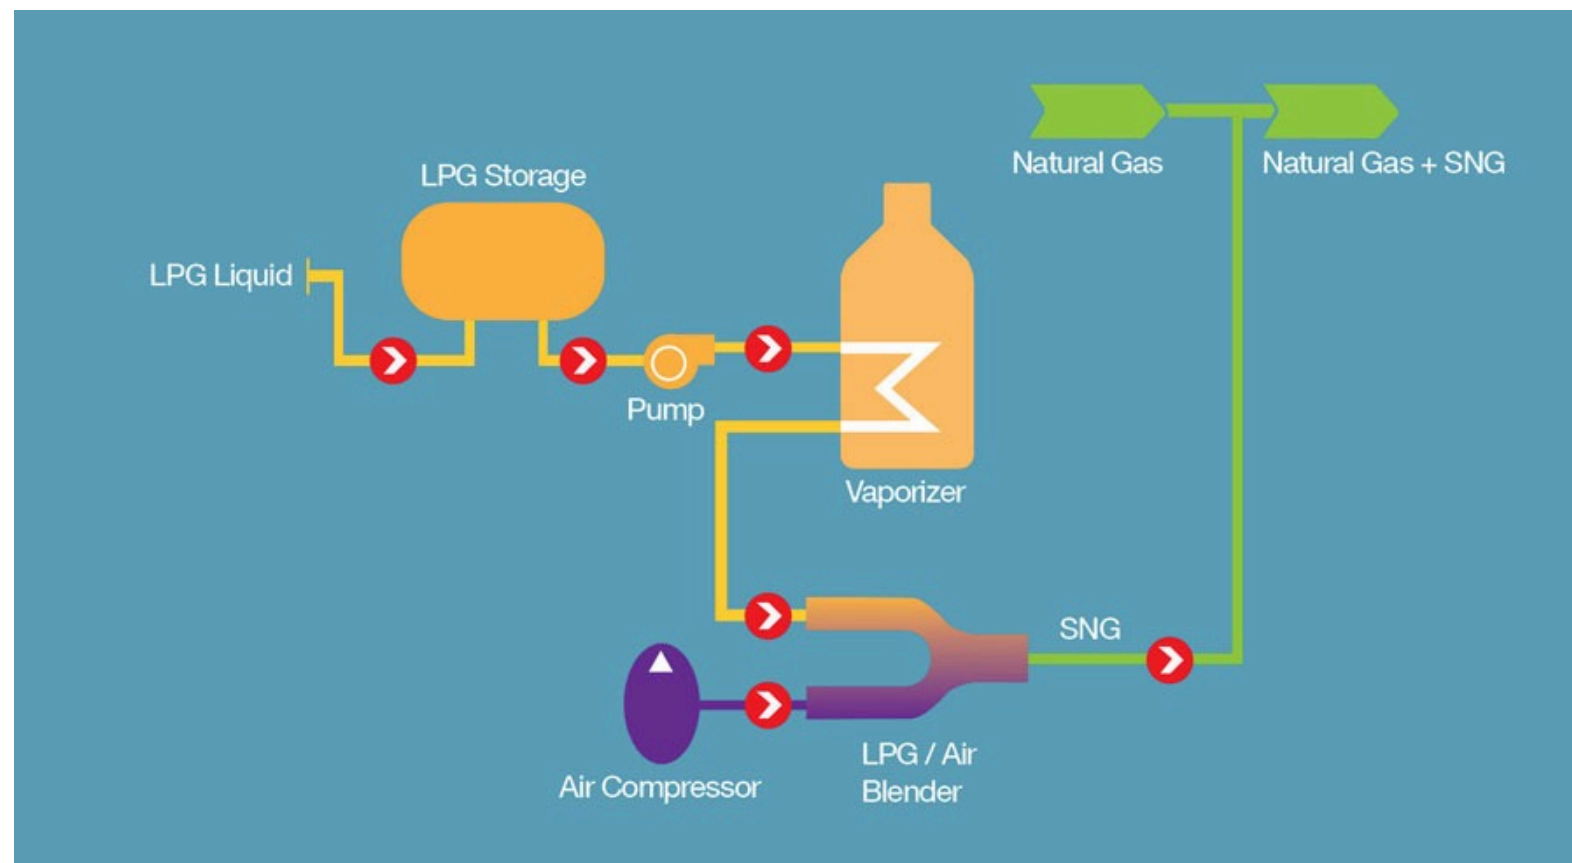

We create and establish pipeline infrastructures that support the efficient conveyance of natural gas across user facilities.

Synthetic Gas (SNG) Systems

Our Synthetic Gas Systems provide a solution in situations where the availability of gas is restricted offering versatility and effectiveness and also called, LPG Air Mix Systems.

These systems mix LPG with air to generate synthetic gas that mimics the characteristics of natural gas ensuring a dependable energy source.

Fuel Systems

We provide advanced solutions for the storage and distribution of liquid fuels such as diesel and kerosene.

Diesel/Kerosene Storage Tanks

Our tanks are designed to safely store liquid fuels and ensure reliability over a long period.

Distribution Network and Pumping Systems

These systems ensure the efficient distribution of fuels across various networks, meeting the needs of industries and commercial operations.

Generator Systems

Our generator systems are designed to keep power on consistently in all environments.

Diesel Generators

Reliable power solutions for a wide range of needs — from small-scale operations to mega industrial set-ups.

UPS Systems

These refer to uninterruptible power supply systems, which protect against power failures by providing the system in operation with backup power.

Gas Generators

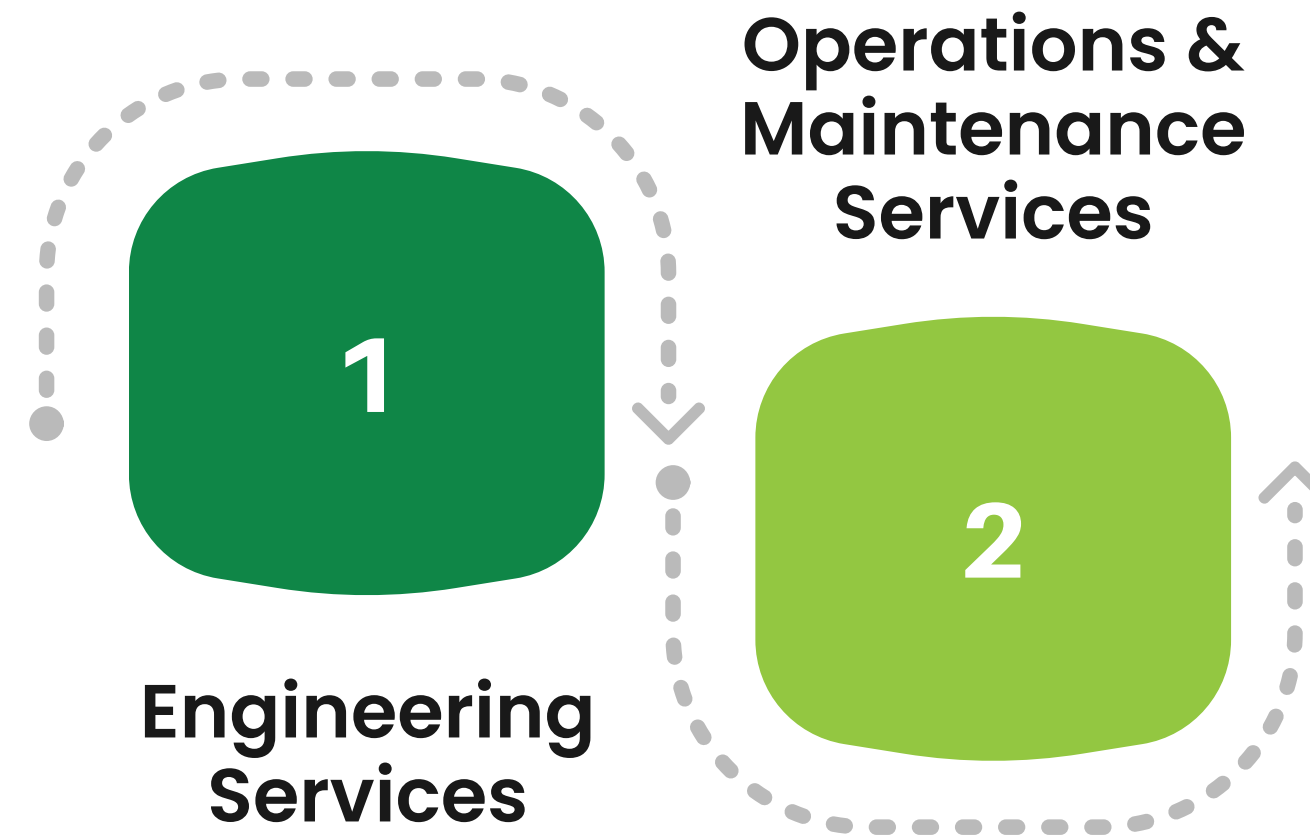

Clean, efficient energy solutions ideal for locations with access to natural gas.

Power Plant Gensets

High-power, robust, and reliable energy solutions.

Our Services

Engineering Services

We provide complete engineering services in support of the entire life cycle of gas and fuel systems.

Consultancy Services

Expert advice on system design, implementation, and optimization, tailored to address specific customer needs.

Design Works

With custom designs on every project to ensure safety, efficiency, and regulatory compliance.

Site Approvals

Assist in the compliance of relevant approvals; ensuring conformance to local (Saudi Building Code) international (NFPA) and other standards as applicable

Operations & Maintenance

Our Operation and Maintenance Services deliver an efficiently working and long-lasting energy system to you.

Annual Maintenance Contracts

Regular preventive maintenance services ensure all systems deliver an optimum performance.

Build Operate Transfer (BOT)

Comprehensive solutions for turnkey project management that cover the entire project lifecycle, from initial construction to ongoing operations and eventual transfer of system assets.

Operation and Maintenance Support

We provide continuous support services that ensure systems run effectively with minimal downtime, ensuring maximum productivity. We also offer operational billing management services with technologically advanced metering solutions.

Why MPS?

Muscat Power Solutions (MPS) is a premium company specializing in Gas, Fuel, and Energy Solutions.

We provide comprehensive engineering and contracting services covering our business segments. MPS carries out **Design, Supply, Installation, Testing, Commissioning, Maintenance, and Operation Services** catering to all market segments.

With our specialized team coming with over 20 years of industry experience, including trained sales professionals, product specialists, and certified engineers we execute projects of all scales and magnitudes throughout the Kingdom.
